───

WORK EXPERIENCE

Wizy Software Labs Inc. | *Quality Assurance Intern*   *August 2023 – September 2023*
- Conducted Exploratory, Regression, Smoke, Manual, and Automation Testing for Mobile and Web Applications as well as Documenting and Reporting Bugs
- Commended for completing work faster than the anticipated time while maintaining accuracy
- Recognized for my ability to think independently and effectively collaborate with a team in an agile environment.

───

EDUCATION

Polytechnic University of the Philippines | *Bachelor of Science in Computer Engineering*
- President's Lister on all accomplished semesters
- Ranked 4th in top performing students in the Computer Engineering department per year level during freshmen year; ranked 9th during 2nd year in the first semester

Romblon State University Laboratory Science High School | *STEM*
- Consistent with High Honors on all accomplished periods/semesters
- Graduated 2nd of the STEP (Science Technology Engineering Program) class in junior high school

───

PROJECTS

H2gether | *GitHub*
- A weather-based water consumption tracker app with a dynamic water plan based on user information
- Collaborated with a team in my role as Backend Developer using Kotlin and Firebase database

Covid Rush | *GitHub* | *Live Site*
- A side-scrolling web-based game using Vanilla JavaScript, HTML and CSS
- Used Vanilla JS with no frameworks to improve programming logic

PUP Map | *GitHub* | *Live Site*
- An interactive map of PUP using JavaScript, HTML, and CSS
